

## Supplier Jaggaer Registration - Assessment Criteria

For your organisation to express interest in working with us, you will need to complete the Eligibility and Compliance questions, you must provide a satisfactory response as per the 'Criteria to Meet' provided below, to each of the questions asked.

To successfully fully register on Jaggaer and obtain 'All Registration Criteria Met' status, you must provide a satisfactory response as per the 'Criteria to Meet' provided below, to each of the additional questions you are asked to respond to. This may be as part of a procurement process or we may ask you to update them separately.

This document shows all questions within the registration process including questions which are conditional based on the response given to associated questions, therefore not all questions will be asked, and also shows the additional information you may be asked to provide later.

Please note registering on Jaggaer will not make your organisation an 'Approved Supplier' and does not guarantee tendering opportunities.

Registration Information	Assessment Information / Guidance
Organisation Name and registered number (where applicable)	<p>For UK registered companies, Companies House (UK) is used to confirm the supplier's name, registered number and confirm their company status. If the status showing on Companies House is anything other than 'Active' the registration will not be progressed.</p> <p>Under 'Organisation Name' the supplier must provide the full registered company name (not trading name). Where a name is incorrectly entered the supplier must contact Jaggaer and request them to amend the details. Jaggaer contact details are published on the supplier login page.</p> <p>Suppliers will be contacted via Jaggaer should there be any queries with the registration information provided.</p>
Admin email address	<p>For security reasons only one named email address should be used by the supplier for their admin account. If more than one has been added, please contact Jaggaer and request the necessary amendments.</p> <p>Suppliers can set up additional users with role permissions as appropriate, please refer to the guidance document found on the Jaggaer landing page.</p> <p>Details of your Administrator can be found via the user profile (click the user name in the top right hand side of the dashboard, then click the ellipsis and 'Print your Supplier Profile').</p>
Registration Status	<p>The supplier can view their company status by going to the Jaggaer Dashboard then navigate to the Qualification Assessment tab as follows:</p> 
<b>Registration statuses:</b>	<b>Status criteria:</b>
All Registration Criteria Met	<p>The supplier has completed all registration questions and any additional questions for their organisation and their response is fully acceptable and compliant with the Assessment Criteria. Only suppliers with this status may be awarded a contract. This status needs to be maintained for the life of any contract awarded.</p> <p>This status is automatically changes to 'Selectable for EOI, PQQ or ITT' one month after the expiry date of the first document to expire in the supplier's profile unless the document(s) is/are updated.</p>
Selectable for EOI, PQQ or ITT	<p>The supplier has submitted all the onboarding information for their organisation and following assessment is deemed to have met the Assessment Criteria for those questions.</p> <p>The supplier must still satisfactorily complete the Health and Safety, Environment, Quality and Insurance questions for their organisation in order to fully meet All Registration Criteria.</p>
Clarification Requested	<p>The supplier has been requested to clarify a response(s) against one of the compliance elements; Organisation Name, Registration Number, Eligibility and Compliance, or Submission Declaration. The supplier can update their response for assessment at any time, however this status prevents the supplier from being considered for any tendering opportunities.</p>
Criteria Not Satisfied	<p>There is missing information from any of the mandatory questions they have been asked to provide. The supplier can update their response for assessment at any time, however this status prevents the supplier from being considered for any tendering opportunities.</p>

The policy should confirm how the supplier aims to discharge relevant legal responsibilities, attention to environmental matters associated with the goods/services/works (protection of the environment, pollution prevention, waste management, sustainability), how the supplier communicates and impresses the policy and arrangements to employees/workforce and how environmental performance is monitored.  The policy provided should be relevant to the anticipated nature and scale of activity to be undertaken and set out responsibilities for environmental management at all levels in the organisation.
	Environmental Management Policy Date	Please confirm the last review date of your environmental management policy as shown on the attached policy document.			The review date must be the same as shown on the Policy.

<b>Carbon</b>	<b>Carbon</b>	<b>Conditional</b>			
	Net Zero Carbon Statement	<p>We have published our route map to net zero carbon. In which we commit to achieving net zero carbon in our operational activities by 2030 and net zero whole life carbon, which includes our supply chain, by 2040.</p> <p>Fuel emissions from suppliers undertaking operational tasks (including maintenance works) on behalf of Wessex Water are included within our 2030 target.</p> <p>Wessex Water requires all of its supply chain to support in achieving these targets by a) recording and providing data and b) reviewing its processes to identify ways of working to decarbonise its activities and products. If not already, suppliers should be looking now at how they will meet both of these requirements.</p> <p>To demonstrate Wessex Water's progress towards achieving these targets data will be required from suppliers undertaking these activities. This will focus on both Operational and Capital carbon (at all project lifecycle stages) therefore will cover fuels used for energy and transport when undertaking these activities plus the data will also need to include embodied carbon in goods, including construction materials, used on capital schemes.</p> <p>Wessex Water's aspirational plan is to implement and align to and eventually accredit to PAS2080 to provide a more common approach to carbon management.</p> <p>Data requirements and reporting frequency will be detailed within any invitation to tender issued or contract awarded.
